

@ONEMail

Cost-efficient email management for small vessels

Industry Use Cases

Fishing

OSVs

Leisure

Coastal Guard

OneMail has been specifically designed for use on small vessels, enabling efficient and secure email service with minimal bandwidth requirements. Typically used by customers who require no more than one email address per vessel, OneMail allows for simple email management, both onboard and remotely.

OneMail is part of the **OptiSoft** application suite by IEC Telecom. OptiSoft offers a wide range of communication services optimised for the maritime sector, including email management, antivirus, data transfer, remote configuration and administration of vessels.

FEATURES

Shoreside management – shoreside dashboard allows email management to help control costs and restrict unnecessary emails from getting through to the server

Designed for use over satellite – deals with high latency circuits and multiple connection management. Compatible with VSAT, Inmarsat, Iridium, Thuraya, GSM, WIFI

Simple email management – provides up to two email addresses per vessel with simple management, via any web-enabled device, including read, forward, reply, attachments, and filing

Maximum efficiency over expensive circuits – files compressed up to 95%, thereby directly saving on airtime costs

Encrypted and secure – multiple virus scanners and spam filters to ensure the mail received is safe and relevant. OneMail keeps user data safe and compliant with data protection legislation

Simple installation – OneMail does not require a lengthy and complicated set up process. The application allows users to access emails straight away, saving time and resources.

Restarts from point of interruption – resumes data transfer from point of interruption, if there is a break in communications. OneMail has the ability to work offline and only connect for the time needed to send and receive data

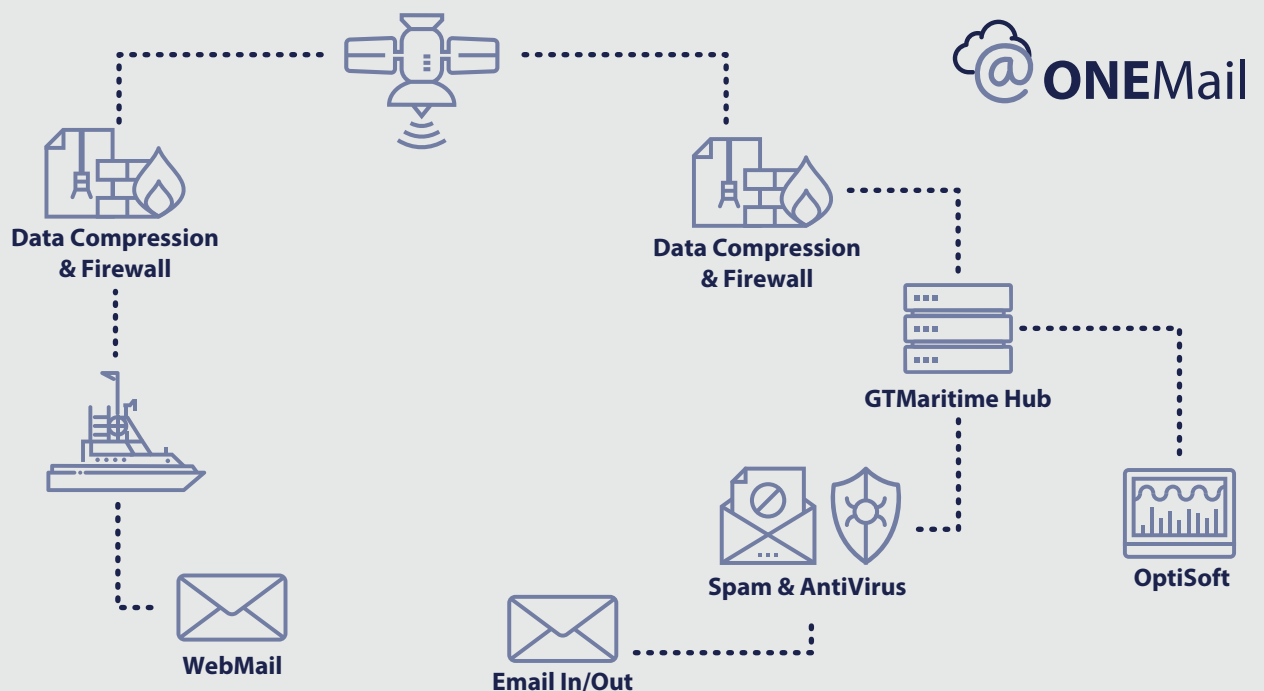

Alerts & reporting – provision to set up alerts and reports to help manage vessels, including delivery, email and communication reports

Fleetwide management control – remote management and configuration of vessels from a single shoreside dashboard

Mail flow filtering – ability to whitelist or blacklist email addresses and management of mail flow to vessels

Solution Architecture

MINIMUM SYSTEM REQUIREMENTS

Please ensure that the PC you wish to install the ONEMail software on has at least the below specifications:

- Microsoft Windows 7 SP1
- Microsoft .NET Framework v4.6.2
- 1GHz processor
- 1GB RAM
- 5GB free disk space

OPERATING SYSTEM REQUIREMENTS

The ONEMail client requires that Microsoft .Net Framework version 4.6.2 is installed.

If this version of .NET is not installed on the machine intended to run ONEMail, please ensure that you select it from the Additional Items section at the bottom of the Downloads page.

PLEASE NOTE: While Microsoft .Net Framework version 4.6.2 is compatible with most modern versions of the Windows operating system, there are some operating systems that it is not compatible with. A full list of compatible operating systems can be found on the Microsoft download center. If you have any queries regarding your system suitability, please contact our Support Centre prior to install.
