

OPTISOFT DASHBOARD

Your virtual portal for fleet management

OptiSoft is a comprehensive application suite by IEC Telecom, offering a wide range of communication services optimised for the maritime sector, including email management, antivirus, data transfer, remote configuration and administration of vessels.

The OptiSoft Dashboard is a cloud-based solution, which provides visibility of the OptiSoft applications. Equipped with a user friendly interface, this portal can be accessed by any web-enabled device.

OPTISOFT provides full visibility over:

 **ONEMail**
Cost-efficient email management for small vessels

 **ONEMailPro**
Email management application intended for corporate network with multiple users

 **ONECover**
Comprehensive antivirus solution, designed to minimise the impact on communication networks

 **ONEShare**
File-transfer service enabling efficient sea to shore data replication
COMING SOON...

KEY FEATURES:

- OptiSoft allows remote configuration and administration of vessels and fleets via a single dashboard, making life easier for both crew and shore-based IT teams

- Organise your fleet per ship or vessel group
- Create one-step silent installs for onboard software deployment
- Allows for rules, alerts and reports to be set up at both a vessel and group level

The screenshot shows the OptiSoft dashboard for IEC Telecom. On the left, there are search filters for Groups and Vessels. The main area displays a table of vessels with columns for Description, Group, OneMailPro, OneCover, GTEoadPlus, and OneMail. Below the table are three callout boxes highlighting key features: 'Flexible set up', 'Cloud based dashboard', and 'Ability to download all products and manuals'. Above the dashboard, seven callout boxes describe other features: 'Manage vessels or custom groups', 'Easy search function for all vessels', 'Monitor status in real time from any device', 'Ability to set up rules, alerts and reports', 'View metrics on data usage, connections and domains', 'Access and configure your apps remotely', and 'What's New function: access all current changes and fixes as well as a historical list'.

IMO 2021 COMPLIANCE

OptiSoft offers a comprehensive portfolio of cyber security solutions which will help vessel owners to comply with IMO 2021 regulations.

PROTECTION: Implement risk control measures and contingency plans, benefit from a free phishing penetration test, and get access to educational materials for your staff and IT personnel.

DETECTION: Any deficiencies in software and security systems could render a vessel “unseaworthy”. IEC Telecom’s multi-layer cyber security coverage offers threat protection, antivirus, scanning, continuity and advanced reporting.

RESPOND: Benefit from our advanced threat protection system. Apply quarantine, archiving, and continuity to suspicious emails; receive antivirus updates in timely manner, and more.

RECOVERY: Ensure business continuity by implementing a comprehensive cyber security policy onboard. We will help to choose the right set of applications for the particular requirements of your vessel and offer advice on how to meet the new regulations in the most efficient manner.
